Basic LATEXFormatting

Tajib Smajlović

1 Inroduction

Basic formatting tags in LATEX

1.1 Text Formatting

All the things you want to do, and sometimes should... emphasis on SOMETIMES.
Bold Formatting is only between the curly braces.
Italic Formatting
Underline Formatting

1.2 Paragraph Formatting

New paragraph are automatically indented.
But sometimes you don't want them to be.

2 Oddities

Strange things I noticed

2.1 Misqouting

This is how I would normally type 'single and "double" quotes. Does it look odd?
Use that *other* quote key you've probably never used before to make it better.
See my new 'single' quotes, and "double" quotes? That's better.

3 Conclusion

These are just a few of the basics elements in a LATEXfile
